**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claim1 is objected to because of the following informalities: in listing the steps that comprise the applicant's address resolution method, the claim reads "renews," rather than renewing (line 18). Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 through 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. As the MPEP 2173.05(b) explains, improper use of the term "type" renders the claim indefinite. While this action points out several claims that are indefinite as a result of the term "type," correct other instances, if any, that are not explicitly mentioned.

With respect to claim 1, the applicant claims an address resolution method that comprises a series of steps, one of which involves transmission over a "connectionless type network" (page15, line 15). Also, claim 1 it is not clear whether or not the "(see ITEF: Internet Engineering Task Force Document RFV826)" is to be read a limitation to the claim (page 15, lines 11-12). The Office would accept an alternate wording 'ARP according to Internet Engineering Task Force Document RFV826.'

Claim 4 refers to a "connectionless type network" (page 16, lines 17, 21 and 22) and is considered indefinite. Claim 5 refers to a "connection oriented type communication system" (page 16, line 25) and is considered indefinite.

Claim 7 refers to "connectionless type network" (page 17, line 14) and is considered indefinite.

With respect to claim 10 details an address resolution system comprised in part by a "connection oriented type network" (page 17, line 9) and a "connectionless type network" (page 17, line 11). In both instances, use of the word type renders the claim indefinite.

Claim 14 refers to a "connectionless type network" (page 20, lines 9 and 10) and is considered indefinite.

***Allowable Subject Matter***

3. Claims 1-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. The available prior art fails to teach or fairly suggest an address resolution method that receives the data packet from the mobile packet terminal on the IWF such that the packet is transmitted to a connectionless network on an IWF when the mobile packet terminal is handed over, and a switch node receives the IWF, where said switch node renews a physical address table and the IWF is determined at the destination, as recited in independent claims 1 and 10.
